Subject: Microsoft Settlement

Dear US DOJ.

Please settle the case with Microsoft. The current proposal seems fair, and we need to move forward and let the technology industry get back to a sense of normalcy. If there is continued doubt about one of the most successful companies in the industry, it will be hard for vendors, partners, and customers to make informed decisions about the future. Please don't let a few competitors try to disrupt one of the most successful runs of technological innovation this country has seen.

Thanks.

Don Barren
